

NOTICE TO EL PASO ELECTRIC COMPANY'S CUSTOMERS

On July 10, 2026, EPE filed its Application for approval of a Certificate of Public Convenience and Necessity ("CCN") and for Right-of-Way ("ROW") Width Approval. EPE's Application seeks approval to construct a new, approximately 14.4 mile long 345 kV transmission line that will follow a single ROW corridor, starting at an upgraded Afton North Substation and ending at EPE's existing Airport Substation. EPE states that this project is necessary to support electrical grid reliability, resiliency, and operational performance, and will enable EPE to continue to provide adequate and reliable service without unnecessary duplication or economic waste. The proposed transmission line is approximately 14.4 miles long, with 12.79 miles on U.S. Bureau of Land Management land.

The estimated cost of the project is approximately \$43.23 million. EPE affirms it is not seeking recovery of costs of this project in this filing, but rather, will seek to recover the New Mexico jurisdictional associated costs, which are approximately 20% of the total cost of the project, through a future general rate case.

Because of different statutory deadlines, the Commission has bifurcated this matter into two separate proceedings:

- A proceeding concerning EPE's request for approval for a CCN to construct, own, and operate a new 345 kV transmission line between the Afton North and Airport Substations, which is labeled Docket No. 26-0000137 and described in a separate Notice being issued at or about the same time as this one.
- A proceeding concerning EPE's request for approval of the necessary ROW width to construct and maintain the transmission line, which is labeled **Docket No. 26-0000143**, and is described in this Notice.

The dates in this Notice apply only to the portions of the Application being heard under Docket No. 26-0000143 and concerning EPE's requested right of way width. Dates

related to the portion of the Application relating to EPE's request for a certificate of convenience and necessity are included in the Notice for Docket No. 26-0000137.

EPE's complete Application is accessible online on EPE's website, <https://www.epelectric.com/company/public-notice/> the Commission's PRCe360 Docketing System at <https://e360.prc.nm.gov/> under Docket Number 26-0000143. The Application is also available at EPE's office, 100 N. Stanton Street, El Paso, Texas 79901. Telephone (915) 543-5711.
