EXHIBITS

Exhibit JS-3S El Paso Electric Company's 2019 Annual Renewable Energy Portfolio Report

1		I. <u>INTRODUCTION AND QUALIFICATIONS</u>
2	Q.	PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.
3	A.	My name is James Schichtl, and my business address is 100 North Stanton Street,
4		El Paso, Texas, 79901.
5		
6	Q.	HOW ARE YOU EMPLOYED?
7	A.	I am employed by El Paso Electric Company ("EPE") as Vice President of
8		Regulatory Affairs.
9		
10	Q.	HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY IN THIS
11		PROCEEDING?
12	A.	Yes. I submitted Direct Testimony in this proceeding on March 31, 2020. I also
13		filed brief Supplemental Testimony in this proceeding on November 8, 2019 in
14		response to the Hearing Examiner's October 18, 2019 Procedural Order and
15		October 22, 2019 Bench Request.
16		
17	Q.	ARE YOU SPONSORING ANY EXHIBITS WITH YOUR SECOND
18		SUPPLEMENTAL TESTIMONY?
19	A.	Yes, I am sponsoring Exhibit JS-3S, a true and correct copy of EPE's 2019 Annual

¹ My March 31, 2020 Direct Testimony replaced the earlier testimony filed October 1, 2019 per the Commission's April 8, 2020 Order Granting Motion to Withdraw Initial Application and Replace with Amended Application and Order Suspending Advice Notice No. 266.

1		Renewable Energy Portfolio Report ("2019 Annual Report") that was
2		simultaneously filed with the Commission's Records Bureau on May 1, 2020.
3		
4		II. PURPOSE OF SECOND SUPPLEMENTAL TESTIMONY
5	Q.	WHAT IS THE PURPOSE OF YOUR SECOND SUPPLEMENTAL
6		TESTIMONY?
7	A.	On April 24, 2020, the Hearing Examiner issued a Second Procedural Order
8		which, in part, directed EPE to file its 2019 Annual Report in this case on May 1,
9		2020, "supported by brief Supplemental Testimony by a person familiar with the
10		document, attesting to the document's authenticity." Second Procedural Order, ¶
11		J. My Second Supplemental Testimony provides information in response to that
12		order.
13		
14	III.	SUPPLEMENTAL INFORMATION RESPONSIVE TO PARAGRAPH
15		J OF THE SECOND PROCEDURAL ORDER
16	Q.	ARE YOU FAMILIAR WITH EPE'S ANNUAL RENEWABLE ENERGY
17		REPORTING REQUIREMENTS?
18	A.	Yes. As EPE's Vice President of Regulatory Affairs, I am very familiar with the
19		statutory and regulatory requirements for reporting EPE's 2019 renewable
20		procurement activities to the Commission.

1	Q.	DID EPE COMPLY WITH THE RENEWABLE ENERGY ACT (NMSA
2		1978, § 64-16-4(G)) AND COMMISSION RULE 572.19 (17.9.572.19 NMAC)
3		REQUIREMENTS TO FILE AN ANNUAL RENEWABLE ENERGY
4		PORTFOLIO REPORT FOR THE PRIOR PLAN YEAR?
5	A.	Yes. EPE filed its 2019 Annual Report with the Commission's Records Bureau
6		on May 1, 2020.
7		
8	Q.	DOES EPE'S 2019 ANNUAL REPORT PROVIDE INFORMATION
9		RESPONSIVE TO THE NEW RENEWABLE ENERGY ACT ANNUAL
10		REPORTING REQUIREMENTS SET FORTH AT SECTIONS 62-16-
11		4(G)(2) AND (4)?
12	A.	Yes. EPE's 2019 Annual Report includes information responsive to
13		Sections 62-16-4(G)(2) and (4).
14		
15	Q.	DOES EPE'S 2019 ANNUAL REPORT PROVIDE INFORMATION
16		RESPONSIVE TO THE COMMISSION'S RULE 572.19 REPORTING
17		REQUIREMENTS?
18	A.	Yes.
19		

1	Q.	CAN YOU ATTEST TO THE AUTHENTICITY OF EXHIBIT JS-3S AND
2		THE ACCURACY OF THE INFORMATION PROVIDED?
3	A.	Yes. Exhibit JS-3S is a true and correct copy of the 2019 Annual Report that was
4		filed with the Commission's Records Bureau on May 1, 2020. The 2019 Annual
5		Report accurately reports EPE's procurement and generation of renewable energy
6		during 2019 including monthly invoices under all authorized procurement
7		contracts as well as a report from WREGIS showing the number of RECs
8		registered and ultimately retired by EPE toward satisfying the annual RPS
9		requirement for 2019. The reported capital, operating, and fuel cost information
10		and carbon dioxide emissions information for EPE's non-renewable generation
11		resources is also accurate. Finally, the 2019 Annual Report accurately reports
12		strategies used by EPE to minimize costs of renewable energy integration.
13		
14		IV. <u>SUMMARY AND CONCLUSION</u>
15	Q.	PLEASE SUMMARIZE YOUR SECOND SUPPLEMENTAL TESTIMONY
16		IN RESPONSE TO THE SECOND PROCEDURAL ORDER?
17	A.	EPE has filed its 2019 Annual Report on May 1, 2020, concurrent with the filing
18		of this supplemental testimony as required by the Second Procedural Order. I am
19		familiar with the contents of the 2019 Annual Report and am qualified to attest to

the accuracy of the 2019 Annual Report and to answer questions regarding the 1 information included therein at the scheduled hearing in this matter. 2 3 **THIS CONCLUDE YOUR SECOND** Q. **DOES** 4 **SUPPLEMENTAL** 5 **TESTIMONY?** 6

Yes, it does.

A.

El Paso Electric Company

[ANNUAL RENEWABLE ENERGY PORTFOLIO REPORT]

Annual Report Pursuant to the Renewable Energy Act, NMSA 1978, § 62-16-4(G) and the New Mexico Public Regulation Commission Rule 572, 17.9.572.19 NMAC

BEFORE THE NEW MEXICO PUBLIC REGULATION COMMISSION

NMSA 1978, § 62-16-4(G); NMPRC RULE 572, 17.9.572.19 NMAC

EL PASO ELECTRIC COMPANY'S 2019 ANNUAL RENEWABLE ENERGY PORTFOLIO REPORT

MAY 1, 2020

INTRODUCTION

El Paso Electric Company ("EPE") hereby files its Annual Renewable Energy Portfolio Report for calendar year 2019 ("2019 Report"), pursuant to the Renewable Energy Act, NMSA 1978, § 62-16-4(G) ("REA" or "Act") and the New Mexico Public Regulation Commission's ("NMPRC" or "Commission"), Renewable Energy Rule for Electric Utilities, 17.9.572.19 NMAC ("Rule" or "Rule 572"). The 2019 Report addresses the reporting requirements set forth in Rule 572.19 and Section 62-16-4(G)(2) and (4) of the Act. ¹

EPE's plan to achieve the renewable portfolio standard requirements for calendar year 2019 (the "Plan") was approved by the Commission in Case No. 18-00109-UT on October 24, 2018. EPE's Plan relied in part on a waiver from full RPS compliance for 2019 and variance from wind and other diversity requirements for 2019 granted by the Commission in Case No. 17-0090-UT. The Plan estimated the renewable energy credits ("RECs") needed to achieve 15 percent RPS in 2019 based on EPE's forecasted 2019 New Mexico retail energy sales of 1,695,153 megawatt-hours ("MWh") less an adjustment for large customers pursuant to Rule 572. EPE's actual 2019 New Mexico retail energy sales were 1,660,947 MWh. The actual RECs needed to achieve 15 percent RPS in 2019 was therefore 241,180 RECs, calculated as 15 percent of the actual retail energy sales (1,660,947 MWh) less the large customer adjustment of 7,962 MWh. Table 1 below provides the forecasted and actual retail energy sales and corresponding RECs needed to meet RPS on a month-to-month basis. EPE's calculation of the large customer adjustment is shown in ATTACHMENT 10. RECs are generally acquired in MWh units, and are so stated in the Report unless otherwise indicated.

¹ EPE addressed subsections 62-16-4(G)(1) and (3) in its 2019-2020 Annual Procurement Plan filed March 31, 2020 in Docket No. 19-00099-UT.

Table 1

REA REQUIREMENTS

A. COST OF CAPITAL, OPERATING, AND FUEL AND CARBON DIOXIDE EMISSIONS FROM RATE-BASED AND DEDICATED NON-RENEWABLE GENERATION RESOURCES

Pursuant to Section 62-16-4(G)(2) of the REA, Table 2 below provides the "capital, operating and fuel costs" during the 2019 calendar year of each of EPE's rate-based and dedicated non-renewable generation resources on a per megawatt basis. Table 2 also provides the "nonrenewable generation resources' carbon dioxide emissions on a per megawatt-hour basis" during 2019.

Table 2									
2019 Nonrenewable Emissions & Costs									
	Emissions		Costs						
Generating Plant	(CO₂)¹ Ib/MWh (gross)		Fuel ² \$/MWh	Capital ² \$/MWh	Operating ² \$/MWh	Total Cost \$/MWh			
Newman Power Plant	1,120.65		15.94	10.53	9.48	35.95			
Montana Power Plant	1,089.66		14.36	35.14	7.02	56.52			
Rio Grande Power Plant	1,276.59		12.61	13.50	13.34	39.45			
Copper Power Plant	2,010.25		36.35	21.24	14.18	71.77			
Palo Verde Power Plant	0		8.42	16.68	18.93	44.03			

- 1. CO₂ Emission Data is calculated using 40 CFR 75 Appendix G methodology.
- 2. Costs are based on the Company's 2019 FERC Form 1 and general ledger. Depreciation expense is included in the Capital \$/MWh calculation.

B. STRATEGIES USED TO MINIMIZE COSTS OF RENEWABLE ENERGY INTEGRATION

Pursuant to Section 62-16-4(G)(4) of the REA, EPE provides the following explanation of its strategies used to minimize costs of renewable energy integration. In sum, EPE works to minimize costs of renewable energy integration by soliciting competitive requests for proposals ("RFP") for both specific RPS resources as well as for system wide resources. Any renewables added as part of a system-wide resource addition may typically result in larger facilities leveraging economies of scale and reducing costs. The evaluation of RFP proposals is inclusive of interconnection points and total cost of integrating the renewables already interconnected and those recently awarded. EPE's renewable energy projects from its 2017 All-Source RFP and 2019 RPS RFP have also included consideration for geographical diversity to mitigate output variability. As EPE integrates higher levels of renewable energy into its system, integration investments, in

addition to interconnection facilities, may be required. Additionally, EPE's system-wide RFP solicitations have been open to demand-side and load-management resources, above and beyond the current Efficient Use of Energy Act requirements, and those submitted in past-RFPs have been evaluated.

EPE solicits RPS specific resources if its existing resources are not sufficient to meet the RPS targets set forth in the REA, considering reasonable cost threshold constraints. If EPE projects that it will need additional renewable energy to meet the statutory RPS targets, EPE initiates a competitive procurement process for renewable energy resources to select the most economic renewable energy resource, or combination of resources.

Over the past several years, EPE has issued several RFPs for supply-side and demand-side resources to meet its capacity needs as well as its RPS. Recently, EPE issued its 2017 All-Source RFP that resulted in the procurement of two 100 MW (200 MW combined) of solar PV, 50 MW of battery storage, and a 226 MW simple-cycle Combustion Turbine ("CT") for system resources. The 2017 RFP resources have been submitted for approval and if approved, the energy and cost will be jurisdictionally allocated between Texas and New Mexico. The New Mexico portion of the renewable resources will provide energy for New Mexico customers towards meeting the RPS. It is important to note that one of the 100 MW projects selected through the EPE 2017 RFP process is one of the lowest, if not the lowest, PPA priced projects procured in the United States to date. The most recent RFP, issued on May 29, 2019 for RPS renewable resources, resulted in two projects being selected, a 50 MW solar PV project and a 20 MW solar PV

project, that when combined, provided the best overall option to meet the RPS at the lowest reasonable cost.

The EPE 2017 RFP and 2019 RFP processes included both a qualitative review and quantitative review. The qualitative review includes criteria such as; bid submitted on time, eligible resource technology, submittal of all forms, bidder experience, site control, interconnection plan, bidder financial capability, amongst others. The quantitative review looks at the economic information for each proposal option and calculates the Levelized Cost of Energy ("LCOE") and Annual Cost for each. Interconnection upgrades, system reliability, curtailment, site location, resource technology type, and associated costs are also evaluated for each proposal option and the resulting costs were added to the LCOE and Annual Costs. If the short-listed projects are of the same technology type, project selection is based on LCOE and/or Total Annual Cost. In contrast, if the short-listed projects include different technology types such as wind, solar, and battery, then both LCOE and resource planning software, such as Strategist and/or Aurora, are used to identify the lowest cost options.

To verify the "cost-reasonableness" of the projects selected, EPE conducted a comparative analysis including published Lazard LCOE for (US Solar Utility Scale)², LCOE from Lawrence Berkley National Laboratory ("LBNL")³ for southwest region independent system operators, and LCOE of Public Service of New Mexico ("PNM"). The analysis showed that the cost of the new EPE procurements was well below the range of the published Lazard LCOE values of \$36-\$44/MWh, and below the range of the published

² https://www.lazard.com/perspective/lcoe2019

³ https://emp.lbl.gov/utility-scale-solar

LCOE values for southwest region ISOs of \$24-\$34/MWh, and comparable to the PNM PPA prices⁴ of \$18.65-19.73/MWh as shown in Figure 1 below.

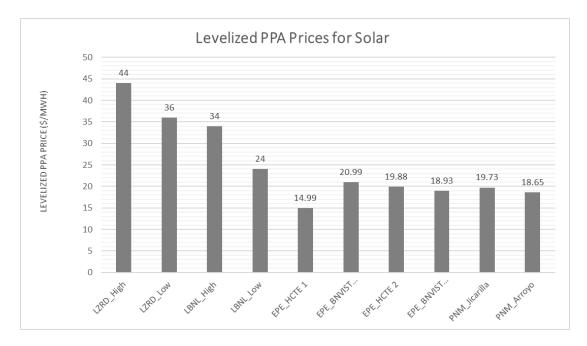

Figure 1. PPA Cost Comparison

RULE 572 REQUIREMENTS

A. ITEMIZATION OF RENEWABLE ENERGY GENERATION AND/OR RENEWABLE ENERGY CERTIFICATE PURCHASES AND SALES

EPE's renewable energy and REC purchases for calendar year 2019, including purchases from customers with distributed generation ("DG") and RECs from EPE's Holloman facility are listed below. EPE also used its own renewable energy generation resources to partially supply its Voluntary Renewable Energy Program ("VRE Program") during calendar year 2019.

⁴ Direct Testimony Thomas Fallgren. PNM Docket 19-00195. Pages 55-57. https://www.pnmresources.com/~/media/Files/P/PNM-Resources/rates-and-filings/San%20Juan%20Abandonment/01-07-2019%20SJGS%20Abandonment/07-24 Direct%20Testimony%20of%20Thomas%20G%20Fallgren.pdf

EPE-Owned Renewable Energy Generation

In December 2009, EPE installed a 75.6 kW_{DC} (approximately 64.3 kW_{AC}) solar photovoltaic ("PV") system, at its Rio Grande Power Station located in New Mexico. EPE used the energy from this system to partially meet customer subscriptions under the VRE Program. In 2019, the PV system at Rio Grande Power Station generated 105,186 kWh.

The jurisdictional allocation of energy and associated RECs from EPE-owned renewable energy generating units for VRE purposes is further described in Section E.

In addition, EPE has six small solar generation facilities located in Texas that are assigned to its Texas retail jurisdiction. Along with the approximately 64.3 kW_{AC} solar PV system installed in December 2009 at its Rio Grande Power Station in New Mexico, an identical size system was installed at the Newman Power Station in Texas, which generated 107,757 kWh in 2019. Another solar project located on the rooftop of EPE's main offices in the Stanton Tower building in downtown El Paso (the "Stanton Project") consists of mono-crystalline solar PV panels, with a total capacity of 31.4 kW_{AC}. In 2019, the Stanton Project generated 64,427 kWh. The energy generated by these solar generation facilities is delivered directly into EPE's distribution system.

In partnership with El Paso Community College ("EPCC"), EPE installed poly-crystalline PV panels with a total capacity of 14.5 kW_{AC} at the Advanced Technology Center facility at EPCC's Valle Verde Campus ("EPCC Project"). The panels are roof and awning mounted. Additionally, EPE donated 2 kW of the project's capacity, which is on pedestal mounts, to EPCC for instructional purposes. The system is owned and operated by EPE, and the energy generated is delivered directly into EPE's distribution system. In 2019, the EPCC Project generated 30,366 kWh.

Another solar project is located on land owned by EPE adjacent to the Wrangler Substation ("Wrangler Project"). The Wrangler Project is a 47.6 kW_{AC} solar concentrated photovoltaic ("CPV") system with dual-axis tracking. The CPV technology uses lenses to concentrate a large amount of sunlight onto a small area of solar PV materials to generate electricity. In 2019, the Wrangler Project generated 21,555 kWh. The energy generated is delivered directly into EPE's distribution system.

The "Van Horn Project," located at EPE's Customer Service Office in Van Horn, Texas, began commercial operation in August 2013. This solar installation is a 20 kW_{DC}, PV system that consists of 80 CentroSolar Poly-Crystalline E250 panels mounted on elevated structures. A monitoring system at the Van Horn Project facility allows EPE to measure the performance of each PV module in order to maximize solar power harvesting. The Van Horn Project generated 34,445 kWh in 2019. The energy generated is delivered directly into EPE's distribution system.

On May 31, 2017, EPE's Texas Community Solar facility began commercial operation. This facility is located next to EPE's Montana Power Station in far East El Paso County. In 2019, this facility generated a total of 8,384,750 kWh of renewable energy.

In October 2018, the 5 MW Solar Project at Holloman Air Force Base ("HAFB") in New Mexico became operational providing additional RECs to the RPS in the same year. The project was approved by the Commission in NMPRC Case No. 15-00185-UT as a customer dedicated resource for HAFB. The project is owned by EPE and paid for by HAFB via a special rate over the life of the project, as approved by the Commission in Case No. 16-00224-UT. Consistent with the approvals in those cases, and EPE's 2016, 2017, and 2018 Plans, EPE has agreed to use the RECs for the RPS at no additional cost to the New Mexico RPS. In 2019, this facility generated a total of 12,391,078 kWh of renewable energy.

EPE Purchases of Renewable Energy and/or RECs

EPE Other Renewable Purchases

PSEG Energy Center is a 10 MW single-axis tracking system with poly-crystalline modules. It is located in Northeast El Paso, Texas, at EPE's Newman Power Station, and was commissioned in December 2014. EPE has a 30-year contract with the owner for the purchase of energy. In 2019, PSEG Energy Center produced 27,088,306 kWh.

EPE Sale of Renewable Energy and/or RECs

EPE sold 96,400 vintage 2019 RECs in 2019 from the Texas jurisdictional portion of the Macho Springs facility.

B. RENEWABLE ENERGY CERTIFICATE INFORMATION

All RECs used for RPS purposes were acquired pursuant to EPE's Commission-approved procurement plans, purchased power agreements, and approved tariffs such as Rate No. 16 – Purchased Power Service ("Rate 16") (NMPRC Case Nos. 05-00355-UT, 06-00365-UT, 07-00360-UT, 08-00219-UT, 09-00259-UT 10-00200-UT, 11-00263-UT, 12-00217-UT, 13-00223-UT, 14-00121-UT, 15-00117-UT, 16-00109-UT, 17-00090-UT, and 18-00109-UT).

On December 13, 2007, EPE became a registered Account Holder with Western Renewable Energy Generation Information System ("WREGIS"). EPE also registered with WREGIS on June 21, 2011 as a Qualifying Reporting Entity to report generation of renewable facilities in New Mexico with capacity greater than 360 kW. EPE also reports to WREGIS the aggregated RECs acquired from customers through EPE's Distributed Generation REC Purchase Program.

A summary of all the RECs acquired by EPE in 2019 and the WREGIS State/Provincial/Voluntary Compliance Report ("WREGIS Compliance Report") are included in

ATTACHMENT 1. The 2019 WREGIS Compliance Report contains the RECs EPE has retired to meet its 2019 RPS.

C. LIST OF RENEWABLE ENERGY CERTIFICATES

EPE retired 213,219 RECs in 2019 for the RPS.

Table 3 below summarizes the RECs acquired and subsequently retired for the RPS.

Table 3									
Contract	Source Type	Acquired RECs	Active RECs

Address: P.O. Box 982

El Paso, TX 79960

Telephone: (915) 521-4475

E-mail: brad.green@epelectric.com

3-7) Transaction Information

Hatch is a 5-MW solar PV facility located in Hatch, New Mexico, that sells renewable energy with associated RECs to EPE under a 25-year purchase power agreement ("Hatch PPA") executed on August 31, 2010. Hatch is obligated, per the Hatch PPA, to sell its entire solar facility output with the transfer of associated RECs to EPE. The Hatch facility began commercial operation on July 8, 2011, and has committed to deliver a minimum amount of renewable energy with associated RECs during each year of the Hatch PPA. In December 2016, the Hatch facility completed a re-paneling of the entire plant to replace the CPV technology with SunPower panels. This re-paneling was performed at no cost to EPE.

The Hatch facility delivered 11,902 MWh of energy to EPE in 2019. EPE paid \$119 per MWh with associated RECs for a total cost of \$1,416,280 for 2019.

Please see **ATTACHMENT 2** for a copy of the monthly REC Transfer Forms from Hatch.

E-mail: <u>brad.green@epelectric.com</u>

3-7) Transaction Information

Solar Roadrunner LLC operates a 20-MW solar PV facility located in Santa Teresa, New Mexico, and sells its entire solar PV system output and transfers all generated RECs to EPE under a 20-year Purchase Power Agreement dated June 4, 2010. The facility began commercial operation on August 29, 2011, and is committed to deliver a minimum amount of renewable energy and associated RECs during each year of the PPA.

The facility delivered 49,585 MWh of energy to EPE in 2019. EPE paid \$127.45 per MWh with associated RECs for a total cost of \$6,270,743 for 2019. In August 2019, the facility delivered 1,535 MWh of energy in excess of 115 percent expected and, as per terms of the PPA, EPE paid \$95.59 per MWh with associated RECs for the excess which is inclusive of the total cost for 2019.

Please see **ATTACHMENT 3** for a copy of the monthly REC Transfer Forms from Solar Roadrunner LLC.

E-mail: <u>brad.green@epelectric.com</u>

3-7) <u>Transaction Information</u>

In 2010, EPE entered into Purchase Power Agreements with SunE EPE1, LLC and SunE EPE2, LLC ("SunE PPAs") for two facilities located in New Mexico with total capacity of 22 MW. The first is a 12-MW facility located in Las Cruces, New Mexico, which came on-line on May 2, 2012. The second is a 10-MW facility located in Chaparral, New Mexico, which became operational on June 25, 2012. The two facilities sell their entire output and transfer all generated RECs to EPE under two 25-year PPA's, both dated November 8, 2010. Under the PPAs, a minimum amount of renewable energy and associated RECs is committed to being delivered from the Las Cruces and Chaparral facilities at a contract rate of \$104.89 per MWh and \$104.05 per MWh, respectively.

The combined facilities delivered to EPE 54,470 MWh of energy and associated RECs for a total cost of \$5,692,041 in 2019.

Please see **ATTACHMENT 4** for a copy of the monthly REC Transfer Forms from SunE EPE1 and SunE EPE2.

<u>MACHO SPRINGS SOLAR, LLC ("MACHO SPRINGS") PHOTOVOLTAIC RENEWABLE</u> <u>ENERGY WITH RENEWABLE ENERGY CERTIFICATES</u>

1) <u>Seller</u>

E-mail: wbonner@southernco.com

2) <u>Utility Owner</u>

Name: EPE

Address: P.O. Box 982

El Paso, TX 79960

Telephone: (915) 521-4475

E-mail: <u>brad.green@epelectric.com</u>

3-7) <u>Transaction Information</u>

In 2012, EPE entered into a Purchase Power Agreement with First Solar for a solar generation facility located adjacent to the Macho Springs Wind Farm in Luna County, New Mexico ("First Solar PPA"). In May 2014, a subsidiary of Southern Company, Southern Power, together with Turner Renewable Energy took over ownership of the plant. The facility is operated by First Solar, with power sold to EPE by Southern Power at the contact rate of \$57.90 per MWh. The Macho Springs facility utilizes thin film PV technology on a ground mounted single axis tracking system, with a total capacity of 50 MWac. EPE obtained approval from the Commission for the First Solar PPA on May 1, 2013 in Case No. 13-00386-UT, and the generation facility began commercial operation on May 23, 2014. Macho Springs is utilized by EPE as a system resource and provides energy to customers in Texas and New Mexico. Energy (with associated RECs) from the facility is allocated monthly to New Mexico customers, with the associated cost for energy recovered through the Fuel and Purchased Power Cost Adjustment

Clause ("FPPCAC") mechanism. As shown in Section F below regarding cost recovery under the RPS, no costs are associated with the RECs allocated to New Mexico from the Macho Springs facility.

The Macho Springs facility delivered 137,921 MWh of energy and associated RECs to EPE in 2019, and 26,862 MWh of that energy and associated RECs was allocated to New Mexico. The total energy costs in 2019 were \$7,985,602, of which, \$1,555,334 were allocated to New Mexico.

Please see **ATTACHMENT 5** for an accounting of the energy allocated for New Mexico customers from Macho Springs, with RECs applicable to EPE's RPS as approved by the Commission in Case No. 13-00223-UT.

FOUR PEAKS ENERGY, LLC'S CAMINO REAL LANDFILL GAS TO ENERGY FACILITY ("CRLEF") BIOMASS RENEWABLE GENERATION ENERGY AND RENEWABLE ENERGY CERTIFICATES

1) Seller

Sisters, Oregon 97759

Sited at: Camino Real Environmental Center

100 Camino Real Blvd. Sunland Park, NM 88063

Telephone: (541) 549-8766 Fax: (541) 549-8766

Email: bbensonenergyneeringsolutions.com

2) Utility Owner

Name: EPE

Address: P.O. Box 982

El Paso, TX 79960

Telephone: (915) 543-2040

E-mail: brad.green@epelectric.com

3-7) Transaction Information

The Four Peaks Energy, LLC CRLEF is a biogas Qualifying Facility ("QF") and EPE purchases all net power produced by the facility under EPE's avoided cost tariff, Rate 16 – Purchased Power Service, on file with the Commission. EPE does not control output from CRLEF and, as a QF supplier, CRLEF has no delivery obligations. Prior to July 1, 2009, under a 10-year Interconnection Agreement executed on May 5, 2006, EPE obtained all the generated RECs associated with the gross output of CRLEF at no additional cost to EPE. In Case No. 09-00259-UT, the Commission approved EPE's ten-year agreement to purchase RECs produced by CRLEF delivered on or after July 1, 2009 at \$15.00 per REC. In Case No. 18-00109-UT, the Commission approved extending that agreement with CRLEF for an additional ten years at an amended REC price of \$30.00 per REC.

On November 6, 2019, the Commission issued an Order Granting The City Of Las Cruces' Motion For Partial Stay Of Commission Order Pending Appeal To The New Mexico Supreme Court ("Stay Order") which stayed its approval of EPE's REC payments to CRLEF pending resolution of the appeal to the New Mexico Supreme Court in Case No. S-1-SC-37,458. While EPE remains obligated under the Commission-approved procurement to pay CRLEF for the RECs that continue to be delivered monthly, EPE stopped making REC payments to CRLEF effective with the October 2019 billing month pursuant to the Commission's Stay Order.

The cost of RECs under contract is \$509,222. CRLEF generated 16,974 RECs in 2019. The amount that EPE paid CRLEF before receiving the Stay Order was \$386,005 for RECs in 2019⁵. Only the REC cost is included in EPE's total RPS procurement cost.

See **ATTACHMENT 6** for a copy of the monthly REC Transfer Forms from the CRLEF and Monthly Outage Reports as required by the Commission's Final Order in Case No. 13-00223-UT.

⁵ Although EPE stopped payments associated with REC purchases following issuance of the stay, EPE is continuing to register CRLEF RECs with WREGIS.

SOUTHWEST ENVIRONMENTAL CENTER ("SWEC") SOLAR PHOTOVOLTAIC / RENEWABLE ENERGY AND RENEWABLE ENERGY CERTIFICATES

1) <u>Seller</u>

Name: SWEC Address: 275 N Main

Las Cruces, NM 88001

Telephone: (575) 522-5552 Fax: (575) 526-7733

E-mail: Whitney Lewis (whitney@wildmesquite.org)

Kevin Bixby (<u>kevin@wildmesquite.org</u>)

2) <u>Utility Owner</u>

Name: EPE

Address: P.O. Box 982

El Paso, TX 79960

Telephone: (915) 521-4475

E-mail: <u>brad.green@epelectric.com</u>

3-7) Transaction Information

SWEC had a 20-year Purchase Power Agreement with EPE, which was executed on August 8, 2006 ("SWEC PPA"). SWEC was obligated per the SWEC PPA to sell its entire solar PV system output to EPE and transfer all generated RECs to EPE at no additional cost to EPE.

Pursuant to prior Commission approvals, EPE applied a weighted value of three-for-one (3x1) to RECs obtained from SWEC. SWEC generated 5 MWh and EPE applied the weighting factor to obtain 15 total RECs (3x5) for 2019. EPE paid SWEC \$130 per MWh for solar energy with associated RECs for a total cost of \$592 in 2019. SWEC lost their lease on the building where the rooftop solar facility was located, it was dismantled by the landlord, and both parties mutually terminated the agreement in October of 2019.

Please see **ATTACHMENT 7** for a copy of the monthly REC Transfer Forms from SWEC.

<u>EPE OWNED HOLLOMAN ATLAS SOLAR ARRARY- HOLLOMAN AIR FORCE</u> BASE/RENEWABLE ENERGY CERTIFICATES

1) <u>Customer</u>

Name: Holloman Air Force Base

Address: HAFB Air Dev Ct.

Holloman AFB NM 88330

2) <u>Utility Owner</u>

Address: P.O. Box 982

El Paso, TX 79960

Telephone: (915) 521-4475

E-mail: brad.green@epelectric.com

3-7) Transaction Information

In August of 2018, the 5-MW EPE-owned solar facility located at Holloman Air Force Base in Otero County began generating test energy; and, in October of 2018, the Facility began commercial operation. In the final order approving the CCN in Case No. 15-00185-UT, the Commission stated that EPE shall make all RECs associated with energy produced by the facility available at no cost for application towards its RPS compliance. As mentioned in section A on page 8 of the report, the facility generated a total of 12,391,078 kWh of renewable energy in 2019.

Please see **ATTACHMENT 8** for a copy of the REC documentation as well as the monthly invoices to Holloman from EPE.

<u>AGGREGATED SOLAR/WIND DISTRIBUTED GENERATION RENEWABLE ENERGY</u> CERTIFICATES FROM QUALIFYING FACILITY PROGRAMS

1) <u>Customers</u>

Participants in Small-Scale Customer Installed DG QF REC Purchase Program

2) <u>Utility Owner/Purchaser</u>

Name: EPE

Address: P.O. Box 982

El Paso, TX 79960

Telephone: (915) 521-4475

E-mail: <u>brad.green@epelectric.com</u>

3-7) <u>Transaction Information</u>

EPE's customer-sited DG REC program went into effect March 1, 2009. In 2019, EPE purchased renewable energy and obtained 40,927 associated RECs, at a cost of \$1,644,107 and an average price of \$40.17 per MWh. These RECs are used to meet EPE's 2019 RPS and resource diversity targets. The REC tariff was closed to new customers in 2017.

Please see **ATTACHMENT 9** for a summary of EPE's 2019 Distributed Generation Program.

D. RETIREMENT OF RECS TO MEET RPS COMPLIANCE

EPE supplied 12.84 percent of adjusted 2019 retail energy sales from renewable resources which equates to 88.41 percent of the adjusted 15 percent RPS target of 241,180 RECs. EPE retired 213,219 RECs for the 2019 Plan Year and, with the Commission-approved waiver and variances approved in Case No. 17-0090-UT, met RPS compliance in the 2019 Plan Year.

ATTACHMENT 1 includes a report from WREGIS confirming the retirement of RECs itemized in Table 4 below for purposes of compliance with the 2019 RPS.

Table 4								
Source Type RECs Retired								
2019 RPS RECs Retired	Wind	-						
	Solar	155,937						
	Other	16,974						
	DG	40,308						
	Total	213,219						

E. VOLUNTARY RENEWABLE TARIFF REQUIREMENTS

EPE offers its New Mexico customers a Voluntary Renewable Energy tariff ("VRE Tariff") for those who want to support renewable energy projects. The VRE Tariff allows customers to purchase renewable energy, at a set premium, in 100 kWh blocks. EPE's VRE Program and the VRE Tariff (Rate No. 32, Voluntary Renewable Energy Rate) were approved by the Commission in NMPRC Case No. 3705, by Final Order issued December 17, 2002. Pursuant to that Final Order, EPE provides an annual VRE accountability report to customers who participate in the program, which is filed on or around July 1 of each year. As of December 31, 2019, EPE had 44 New Mexico participants in the VRE Program. For calendar year 2019, EPE's New Mexico customers subscribed to 638,800 kWh, and EPE collected \$56,661 from its participating New Mexico VRE program customers during 2019. As of December 31, 2019, EPE

has collected a cumulative total of \$1,348,961 towards reinvestment in future renewable energy programs and projects.

EPE supplies renewable energy for VRE customers from its Rio Grande Solar PV installation. However, for 2019, EPE still required additional kWh for the VRE Program. EPE utilized RECs produced by the 10 MW Newman Solar LLC PPA, which is registered with the Electric Reliability Council of Texas ("ERCOT"). Utilizing these renewable energy resources, EPE was able to fully satisfy the 2019 REC requirements for the VRE Program in New Mexico. Renewable energy and RECs provided to New Mexico customers under the VRE Tariff are not used to comply with the New Mexico RPS requirements. EPE will record and retire all RECs associated with renewable energy production and purchases used to meet its New Mexico customer subscriptions under the VRE Program through WREGIS or through the Texas REC electronic accounting system administered by ERCOT. No paper RECs are created or maintained in the ERCOT system.

F. APPROVED COST RECOVERY MECHANISMS

The Commission's Final Order in Case No. 17-00090-UT, approved EPE's original Rate No. 38 – Renewable Portfolio Standard Cost Rider, effective January 1, 2018 to recover EPE's Commission-approved procurement costs.

Subsequently, in Case No. 18-00109-UT, the Commission authorized EPE to recover beginning January 1, 2019 through its RPS Cost Rider the costs associated with its 2019 Plan, including costs that EPE incurs for bundled energy and associated RECs, costs for RECSs, and costs associated with registration of RECs with WREGIS as required by 17.9.572.13.E NMAC.

Table 5 below shows the costs associated with EPE's authorized 2019 procurement based on the approved recovery method.

RENEWABLE ENERGY CERTIFICATE

Period: For the month of January, 2019

Source of REC: Renewable Energy Provider

Hatch Solar Energy Center I, LLC 7349 Highway 26 Hatch, NM 87937

Contact: John M. Dailey Business Manager 700 Universe Blvd, FEB/JB E3446 Juno Beach, FL 33408

Generator type: Concentrating Solar Photovoltaic

Nameplate capacity (in MW): 5.04 MW
Date of generator start-up: June 24, 2011

Fuel Source: Solar

Revenue Meter manufacturer and identification / serial number:

ION 7650 / LJ-1105A306-02

Location of generator: 32° 37.527'N, 107° 15.586'W

Renewable Energy Purchaser:

Interconnection Utility: El Paso Electric Company

Control Area Operator: El Paso Electric Company

EPE Contact: Evan Evans P.O. Box 982 El Paso, TX 79960 (915) 543-5995 Fax (915) 521-4729

MONTHLY STATEMENT OF RECS

Renewable Energy delivery for the month of January, 2019

Energy Delivered 814,544.90 kWh

SUPPLIER CERTIFICATION

I, John M Dailey, herby certify that:

The energy produced, sold and delivered by Hatch Solar Energy Center I, LLC to El Paso Electric Company from these facilities is from a renewable energy resource, as defined by the New Mexico Renewable Energy Act, NMSA 1978, Section 62-16-1 et seq., and the NMPRC Rule 572, Renewable Energy For Electric Utilities, 17.9.572 NMAC;

Each kilowatt hour of electricity is generated using a solar fuel source; and

No other Renewable Energy Certificates associated with the renewable energy produced and delivered by Hatch Solar Energy Center I, LLC to El Paso Electric Company have been traded, sold, retired or otherwise transferred by Hatch Solar Energy Center I, LLC to any other person or entity.

MONTHLY STATEMENT OF RECS

Renewable Energy delivery for the month of January 2019

Energy Delivered 8,208,142 kWh

Weighted Value of Energy Delivered kWh: 8,208,142 kWh (multiply by RPS multiplier)

SUPPLIER CERTIFICATION

I, Vallery Brown, hereby certify that:

The energy, produced, sold and delivered by Macho Springs Solar, LLC ("Seller") to El Paso Electric Company from these facilities is from a renewable energy resource, as defined by the New Mexico Renewable Energy Act, NMSA 1978, Section 62-16-1 et seg., and the NMPRC Rule 572, Renewable Energy For Electric Utilities, 17.9.572 NMAC;

Each kilowatt hour of electricity is generated using a solar fuel source; and No other Renewable Energy Certificates associated with the renewable energy produced and delivered by Seller to El Paso Electric Company have been traded, sold, retired or otherwise transferred by Seller to any other person or entity.

RENEWABLE ENERGY CERTIFICATE of 365

Renewable Energy Generated: 1,489,007 kWh

Renewable Energy Provider: Four Peaks Energy LLC.

QF FERC File Docket: QF06-224-002

Generator Type: 2 x Caterpillar 3520C

Nameplate Capacity: 3.2 MW Fuel Source: Landfill Gas

Generation Meter Manufacture and Identification of Serial Number: CAT EMCP SN#15850009HE & 15760019HE

Location of Generator: Four Peaks Energy Plant, Camino Real Environmental Center,

1001 Camino Real Blvd, Sunland Park, New Mexico 88063

Contact: Benny Benson, Manager, Four Peaks Energy LLC.

15820 Barclay Drive, Sisters, OR 97759 Ph: (541) 719-1123, Mbl: (541) 390-7232

Renewable Energy Purchaser: El Paso Electric Company Interconnection Utility: El Paso Electric Company Control Area Operator: El Paso Electric Company

EPE Contact: Brad Green, PO Box 982, El Paso, TX 79960

Ph: (915) 521-4475, Mbl: (915) 526-3978

I Benny Benson hereby certify that:

The energy generated, sold, and delivered by Four Peaks Energy, LLC. to El Paso Electric Company from this facility is from a renewable energy resource, as defined by the New Mexico Renewable Act, NMSA 1978, Section 62-16-1 et seq., and the NMPRC Rule 572, Renewable Energy For Electric Utilities, 17.9.572 NMAC;

Each kilowatt-hour of electricity is generated using biomass and/or landfill gas fuel sources, thus representing one (1) kilowatt-hour toward compliance with the renewable portfolio standard set forth in the New Mexico Renewable Energy Act and NMPRC Rule 572;

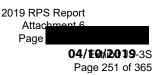

No other Renewable Energy Certificate(s) associated with the renewable energy produced and delivered by Four Peaks Energy, LLC to El Paso Electric Company have been traded, sold, or otherwise transferred by Four Peaks Energy, LLC to any other person or entity.

RENEWABLE ENERGY CERTIFICATE of 365

Renewable Energy Generated: 1,605,129 kWh

Renewable Energy Provider: Four Peaks Energy LLC.

QF FERC File Docket: QF06-224-002

Generator Type: 2 x Caterpillar 3520C

Nameplate Capacity: 3.2 MW Fuel Source: Landfill Gas

Generation Meter Manufacture and Identification of Serial Number: CAT EMCP SN#15850009HE & 15760019HE

Location of Generator: Four Peaks Energy Plant, Camino Real Environmental Center,

1001 Camino Real Blvd, Sunland Park, New Mexico 88063

Contact: Benny Benson, Manager, Four Peaks Energy LLC.

15820 Barclay Drive, Sisters, OR 97759 Ph: (541) 719-1123, Mbl: (541) 390-7232

Renewable Energy Purchaser: El Paso Electric Company Interconnection Utility: El Paso Electric Company Control Area Operator: El Paso Electric Company

EPE Contact: Brad Green, PO Box 982, El Paso, TX 79960

Ph: (915) 521-4475, Mbl: (915) 526-3978

I Benny Benson hereby certify that:

The energy generated, sold, and delivered by Four Peaks Energy, LLC. to El Paso Electric Company from this facility is from a renewable energy resource, as defined by the New Mexico Renewable Act, NMSA 1978, Section 62-16-1 et seq., and the NMPRC Rule 572, Renewable Energy For Electric Utilities, 17.9.572 NMAC;

Each kilowatt-hour of electricity is generated using biomass and/or landfill gas fuel sources, thus representing one (1) kilowatt-hour toward compliance with the renewable portfolio standard set forth in the New Mexico Renewable Energy Act and NMPRC Rule 572;

No other Renewable Energy Certificate(s) associated with the renewable energy produced and delivered by Four Peaks Energy, LLC to El Paso Electric Company have been traded, sold, or otherwise transferred by Four Peaks Energy, LLC to any other person or entity.

Supplier certification

I, Kevin Bixby, hereby certify that:

The energy produced, sold and delivered by the Southwest Environmental Center to El Paso Electric Company from these facilities is from a renewable energy resource, as defined by the New Mexico Renewable Energy Act, NMSA 1978, Section 62-16-1 et seq., and the NMPRC Rule 572, Renewable Energy for Electric Utilities, 17.9.572 NMAC;

Each kilowatt hour of electricity is generated using a solar fuel source. Each kilowatt-hour ("kWh") produced and delivered to El Paso Electric Company therefore represents 3.0 kWh toward compliance with the renewable portfolio standard set forth in the New Mexico Renewable Energy Act and NMPRC Rule 572: and

No other Renewable Energy Certificates associated with the renewable energy produced and delivered by the Southwest Environmental Center to El Paso Electric Company have been traded, sold, retired or otherwise transferred by the Southwest Environmental Center to any other person or entity.

Energy Efficiency Programs

Energy Efficiency programs are designed to result in cost savings and benefit the environment. For every \$1.00 spent on these programs, customers typically save nearly double that amount over time on the cost of providing electricity, and program participants will save even more. Learn more about these programs and rebates that may be available to you at www.epelectric.com.

El Paso Electric (EPE) is dedicated to providing quality, reliable service to you, our valued customer. This booklet is presented as a summary of your rights as a customer and other useful information regarding your service with EPE. Please visit the EPE website at www.epelectric.com to access the "Your Rights as a Customer" booklet.

Energy Efficiency Programs

Energy Efficiency programs are designed to result in cost savings and benefit the environment. For every \$1.00 spent on these programs, customers typically save nearly double that amount over time on the cost of providing electricity, and program participants will save even more. Learn more about these programs and rebates that may be available to you at www.epelectric.com.

Renewable Portfolio Standard Recovery

This Rider is established to recover Renewable Portfolio Standard (RPS) compliance costs.

Your Rights as a Customer

El Paso Electric (EPE) is dedicated to providing quality, reliable service to you, our valued customer. This booklet is presented as a summary of your rights as a customer and other useful information regarding your service with EPE. Please visit the EPE website at www.epelectric.com to access the "Your Rights as a Customer" booklet.

Energy Efficiency Programs

Energy Efficiency programs are designed to result in cost savings and benefit the environment. For every \$1.00 spent on these programs, customers typically save nearly double that amount over time on the cost of providing electricity, and program participants will save even more. Learn more about these programs and rebates that may be available to you at www.epelectric.com.

Renewable Portfolio Standard Recovery

This Rider is established to recover Renewable Portfolio Standard (RPS) compliance costs.

Chloe, hopefully you have all the files now. I had to still zip the "as built" stamped engineering drawings and the size went from 20 MB to 16 MB and I hope you got it. I did not receive a notification that it did not go. Please let me know. Thanks for your help.

Hopefully you now have everything as below:

Section 3.1 - WREGIS Acknowledgement of Station Service

Section 3.1 (a):

EIA 860 for most recent year

Utility Interconnection Agreement (Please see attached "as built" stamped engineering drawings as per previous discussions with WREGIS, there is no Interconnection Agreement – See attached e-mail communication with Marshelle Butler back in June 2018)

Manufacturer's Specifications É

Revenue Meter ID – 3180330084 (see pic attached) .≥

Purchase Power Agreement – see copy of Holloman Contract for Service between EPE and Holloman – see Exhibit B Special Rate Contract page 33 of 53 – see attached e-mail communication with Marshelle Butler back in June 2018) >

Rights to environmental attributes – see copy of CCN Final Order and Recommended Decision (page 21 under Decretal Paragraph A. (6). Ϋ́. <u>'</u>

Notification of Commercial Operation (i.e. Substantial Completion Certificate)

BEFORE THE NEW MEXICO PUBLIC REGULATION COMMISSION

IN THE MATTER OF EL PASO ELECTRIC COMPANY'S APPLICATION FOR A CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR A 5MW SOLAR POWER GENERATION PROJECT AT HOLLOMAN AIR FORCE BASE

Case No. 15-00185-UT

FINAL ORDER ADOPTING RECOMMENDED DECISION WITH MODIFICATION

THIS MATTER comes before the New Mexico Public Regulation Commission (the "Commission") upon the September 30, 2015 Recommended Decision issued by Hearing Examiner Carolyn Glick on the Application of El Paso Electric Company ("EPE") for a Certificate of Public Convenience and Necessity ("CCN") for a 5MW Solar Generation Project at Holloman Air Force Base in Otero County, New Mexico (Project) in accordance with NMSA 1978, Sections 62-9-1 and 62-9-6. Having considered the pleadings, testimony and the Recommended Decision and being otherwise duly informed in the premises,

THE COMMISSION FINDS AND CONCLUDES:

- 1. The Commission has jurisdiction over the parties and the subject matter of this case.
- No exceptions to the Recommended Decision have been filed by any of the parties to this proceeding.
- 3. The Recommended Decision, including the Statement of the Case, Discussion, Findings of Fact and Conclusions of Law, and Decretal Paragraphs recommended by the Hearing Examiner, is well taken and should be ADOPTED, APPROVED, and ACCEPTED as the Order

of the Commission with the exception of Decretal Paragraph A(2). The Commission notes that because decretal paragraphs A(2) and B overlap, but potentially conflict, paragraph A(2) should be removed. Because Paragraph B is broader and affords ratepayers greater protection from potential unrecovered costs of the Project, it should control.

IT IS THEREFORE ORDERED:

- A. The Recommended Decision, including the Statement of the Case, Discussion, Findings of Fact and Conclusions of Law, and Decretal Paragraphs recommended by the Hearing Examiner, as modified by the removal of paragraph A(2), is well taken and should be ADOPTED, APPROVED, and ACCEPTED in its entirety as the Order of the Commission.
 - B. This Order is effective immediately.
- C. Copies of this Order shall be provided to all persons listed on the attached Certificate of Service, via e-mail to those whose e-mail addresses are known, and otherwise via regular mail.
 - D. This Docket is closed.

Case No. 15-00185-UT Final Order Adopting Recommended Decision With Modification Page 2 of 3 ISSUED under the Seal of the Commission at Santa Fe, New Mexico this 7th day of October, 2015.

BEFORE THE NEW MEXICO PUBLIC REGULATION COMMISSION

IN THE MATTER OF EL PASO ELECTRIC COMPANY'S APPLICATION FOR A CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR A 5 MW SOLAR POWER GENERATION PROJECT AT HOLLOMAN AIR FORCE BASE

Case No. 15-00185-UT

RECOMMENDED DECISION

Carolyn R. Glick, Hearing Examiner for the New Mexico Public Regulation

Commission (PRC or Commission) issues this Recommended Decision pursuant to

1.2.2.37(B) NMAC. The Hearing Examiner recommends that the Commission adopt this Recommended Decision in its Final Order. The Hearing Examiner FINDS AND

CONCLUDES:

I. Statement of the Case

On June 15, 2015, El Paso Electric Company (EPE) filed an Application seeking expedited approval of a certificate of public convenience and necessity (CCN) for EPE to construct, own and operate a 5 megawatt (MW) solar photovoltaic generating plant within the Holloman Air Force Base (HAFB) in Otero County, New Mexico, to be called the Holloman Solar Facility (the Project or Facility). The Project would be built at the request of HAFB for purposes of load retention and the costs of the Project would be paid for by HAFB. In support of its Application, EPE filed the Direct Testimonies of James Schichtl, Richard Turner, and Cynthia Prieto.

On June 24, 2015, the Commission issued an Order designating the undersigned to preside over this proceeding. The Commission ordered the undersigned to attempt to conduct any required hearing and expeditiously issue a recommended decision consistent with EPE's stated goal of obtaining approval of its Application by November 30, 2015.

The Hearing Examiner issued a Procedural Order which, among other things, (i) set an August 11, 2015 deadline for filing Staff/Intervenor Testimony; (ii) set an August 21, 2015 deadline for filing Rebuttal Testimony; (iii) set a September 10, 2015 protest deadline; and (iv) scheduled a public hearing on September 15 and 16, 2015. However, the Order states that the "hearing may be vacated if deemed not required at the discretion of the Hearing Examiner or Commission."

Motions for Leave to Intervene were filed by the Coalition for Clean Affordable Energy and Dona Ana County.

Staff filed the Direct Testimonies of Bruno Carrara and David Ault. No Intervenor filed testimony.

In response to Bench Requests, EPE filed the Supplemental Testimonies of James Schichtl and Richard Turner.

EPE filed a Proof of Publication, showing that the Notice attached to the Procedural Order was published in the *Las Cruces Sun-News* on July 9, 2015.

No protests were filed by the September 10, 2015 protest filing deadline.

On September 9, 2015, the Hearing Examiner issued a Bench Request requiring EPE, after conferring with the parties, to file a response stating whether any party believed that a hearing should be held in this case and, if not, whether the parties agreed to admission into evidence of documents listed in the Bench Request.

On September 11, 2015, EPE filed a Response to the Bench Request, signed and approved by all parties, stating that all parties agreed that the hearing should be vacated

and that the documents identified in the Bench Request should be admitted into evidence.

The Response also states that EPE agrees to the conditions recommended by Staff witness

Bruno Carrara at page 13 of his Direct Testimony (conditions 'a' through 'h'), and that EPE and Staff agree that conditions 'e' and 'f' can be combined into one compliance filing to be filed no later than 45 days after the in-service date of the Project.

On September 11, 2015, the Hearing Examiner issued an Order Vacating Hearing and Admitting Exhibits Into Evidence. She found that, because no protest was filed and because of the uniqueness of the nature of EPE's CCN Application, a public hearing on the merits of EPE's Application was not required. The Order admitted the following exhibits into evidence:

EPE Exhibits:

- 1. Direct Testimony of James Schichtl
- 2. Direct Testimony of Richard Turner
- 3. Direct Testimony of Cynthia Prieto
- 4. Supplemental Testimony of James Schichtl (cited as Schichtl First Supplemental)
- 5. Supplemental Testimony of Richard Turner
- 6. EPE's Corrected Cover Letter, dated August 21, 2015, pursuant to 17.9.570.11 NMAC

Staff Exhibits

- 1. Direct Testimony of Bruno Carrara
- 2. Direct Testimony of David Ault

On September 15, 2015, the Hearing Examiner issued a Third Bench Request requiring EPE to file additional Supplemental Testimony and, after conferring with the parties, file a response stating whether the parties agreed to admission into evidence of EPE's response to this Bench Request.

On September 18, 2015, EPE filed the Supplemental Testimony of James Schichtl. It also filed its Response to Third Bench Request, signed and approved by all parties, stating

On September 30, 2015, the Hearing Examiner issued an Order admitting into evidence the following exhibit:

EPE Exhibit

7 James Schichtl's Supplemental Testimony filed on September 18, 2015 (cited as Schichtl Second Supplemental)

II. EPE's Retail Contract with Holloman Air Force Base

EPE is a Texas corporation registered to conduct business in New Mexico. Schichtl Direct 8; Carrara Direct 4. It is a public utility as defined by the New Mexico Public Utility Act.

In Case No. 2722, the PRC allowed EPE to enter into special rate contracts with non-residential customers as allowed by NMSA 1978, § 62-6-26 ("Economic development rates for gas and electric utilities; authorization"). The PRC required PRC approval of such special rate contracts before they take effect and ordered that EPE would have the burden of proof in a future rate case to demonstrate why any revenue shortfall resulting from special rate contracts should be allocated to other customers. Case No. 2722, Final Order (9-24-98). The latter provision reflects the PRC's intent that special rate contracts include pricing terms above incremental costs. Case No. 06-00090-UT, Final Order, ¶ 8 (5-9-06).

In Case Nos. 03-00302-UT and 09-00171-UT, the PRC allowed EPE to continue to enter into special rate contracts, subject to the same conditions. Case No. 03-00302-UT, Final Order (4-27-04); Case No. 09-00171-UT, Final Order Conditionally Approving and Clarifying Unopposed Stipulation (12-10-09), Exh. 1, § 7.

¹ The statute was amended in 2015.

In Case No. 06-00090-UT, the PRC approved a special retail contract between EPE and HAFB dated February 28, 2006, governing the terms and conditions of EPE's provision of electric service to HAFB (Current Contract). The term of the contract is ten years and expires on January 31, 2016. Case No. 06-00090-UT, Final Order, ¶ 4. The PRC approved the Contract "upon the express condition that EPE shall have the burden of proof to demonstrate why any revenue shortfall resulting from its special rate contract with HAFB should be allocated to other customers." *Id.*, ¶ A. EPE witness James Schichtl says that EPE does not allocate any revenue shortfall under the Current Contract. Schichtl Direct 5-6.

Under the Current Contract, HAFB pays a monthly demand charge of \$13/kW of metered demand and an energy charge of \$0.04677/kWh. Schichtl Second Supp. 3. Absent the Current Contract, HAFB would pay the rates under EPE's Rate No. 10 (Military Research and Development Power Rate), which are a monthly demand charge of \$19.29/kW of metered demand and an energy charge of \$0.04330/kWh.

In 2009, the population of HAFB was 5,854. By 2013, the population had grown to 11,964, a 49% increase. Ault Direct 6.

In 2014, EPE's revenue from HAFB (\$5,156,014) was 2.69% of its total New Mexico revenue (\$191,983,083). In 2014, HAFB's energy use (70,784 MWh) was 4.31% of total New Mexico energy use by EPE's customers (1,641,388 MWh). Schichtl Second Supp. 3-4.

The United States Air Force's Energy Strategic Plan includes a goal of increasing facility consumption of renewable or alternative energy to 25% of total electricity use by 2025. Exh. JS-1-S, p.15, to Schichtl Second Supp.

III. Standard for Approval of a CCN

No public utility shall begin construction or operation of any public utility plant or system without first obtaining from the Commission a certificate that public convenience and necessity require or will require such construction or operation (a CCN). NMSA 1978, § 62-9-1(A). In determining whether any certificate shall issue, the Commission shall give due regard to public convenience and necessity. *Id.*, § 62-9-6. The "public convenience and necessity" standard implies a net public benefit. *Re Valle Vista Water Util. Co.*, 212 P.U.R. 4th 305 (2001). The Commission has equated the "public convenience and necessity" with the public interest. *Re Public Serv. Co.*, 119 P.U.R. 4th 48, 50 (1990), *aff'd*, *Public Serv. Co. v. New Mexico Pub. Serv. Comm'n*, 1991-NMSC-083, 112 N.M. 379.

The PRC's Integrated Resource Plan Rule (IRP Rule), 17.7.3 NMAC, is relevant to consideration of a CCN request. The IRP Rule requires that utilities file substantive plans for system-wide resource planning and additions, in part to assist the Commission in its review of plant additions that require CCN approval. Specifically, the IRP Rule states: "In a proceeding concerning a utility's request for a CCN for a new utility resource ... the utility shall present evidence that the requested resource is consistent with the commission-accepted utility IRP Evidence that the resource is consistent with the IRP, and that there have not been material changes that would warrant a different course of action by the utility, will constitute prima facie evidence that the resource type, but not the particular resource being proposed, is required by the public convenience and necessity."

Also, PRC Rules 17.5.440 NMAC ("Rule 440") and 17.9.570 NMAC ("Rule 570") require certain informational filings for plant additions. Under Rule 440, a utility must

provide notice and technical and cost information to the Commission regarding anticipated transmission, distribution or generation plant extensions and additions. Under Rule 570.11(C)(2), a utility must provide the Commission with notice and cost information for new capacity additions.

IV. EPE's Request for a CCN

EPE requests a CCN to construct, own and operate a 5 MW ground-mounted solar photovoltaic (PV) generating facility on land wholly within Holloman Air Force Base (HAFB), located southwest of Alamogordo in Otero County (the Project or Facility).

Schichtl Direct 3. The energy from the Project would be delivered to the HAFB distribution system but the Facility would be an EPE-owned resource dedicated to serve HAFB. HAFB would be the sole purchaser of energy generated by the Facility. Turner Supp. 2-3; Carrara Direct 5.

The Project would use a single-axis tracking system to allow the PV panels around one axis to follow the sun as it moves across the sky, which increases the solar radiation absorbed by the panels and the capacity factor of the Facility, in contrast to a fixed system. EPE expects the Project to generate 14,022 MWh in the first year, equaling about a 32% capacity factor. Turner Direct 5.

The Project was requested by the United States Air Force (USAF) to help it meet a renewable energy goal to receive 25% of its energy from renewable resources by 2025.

Turner Direct 3. USAF desires to take advantage of the cost reduction available from a 30% Investment Tax Credit (ITC) because a lower cost for the Project equates to a lower cost of energy for USAF. EPE requests the CCN to accommodate HAFB, one of its major New

Mexico customers, in meeting its unique energy needs. Schichtl Direct 6-7, 10; Turner Direct 7.

EPE would incur the Project costs, but would recover all costs from HAFB over the life of the Facility. EPE would not seek rate recovery of the Project costs from its New Mexico customers other than HAFB. The full cost of the Facility would be recovered through HAFB's purchase of energy from EPE under a special rate contract (Replacement Contract) "for load retention purposes." The Replacement Contract would replace the existing 10-year Contract (Current Contract) expiring in January 2016 and would be subject to PRC approval. The Replacement Contract has not yet been executed. EPE says, "As such, the CCN could be conditioned upon HAFB paying for the costs of the Project and its energy output." Schichtl Direct 5, 13; Turner Supp. 3.

In its first full year of operation, the Facility is expected to produce 14,023 MWh or 19.81% of HAFB's 2014 energy use. Schichtl Second Supp. 3.

HAFB would lease to EPE about 53 acres of land on which the Project would be constructed. The cost of the lease to EPE is still being negotiated, but no lease cost would be recovered from any EPE ratepayer other than HAFB. The lease cost would be included in the cost of energy charged to HAFB. Schichtl Direct 10; Turner Direct 4; Turner Supp.

EPE proposes to retain the renewable energy certificates (RECs) associated with generation of solar energy from the Facility at no cost and would apply the RECs to its New Mexico Renewable Portfolio Standard with no impact to its Renewable Cost Threshold.

Schichtl Direct 3, 8, 10.

Under the Replacement Contract, EPE expects that HAFB would pay a fixed energy price for energy produced by the Facility. EPE estimates a levelized cost of energy (LCOE)

for the 30-year expected life of the Facility of \$85.30 per MWh. Schichtl Direct 11-12. Staff suggests that calculating a LCOE for the Facility is not appropriate and estimates a \$72.56 per MWh cost of energy, which is the simple arithmetic average of the energy unit over 30 years. Staff estimates a \$141 per MWh cost of energy in the first year of operation, declining to \$39 per MWh after 30 years. Staff observes that the per MWh cost "is relatively high[.]" Carrara Direct 6-7.

EPE would finance the Project through debt and equity and would recover all financing costs from HAFB. EPE expects that financing the Project would not negatively affect its financial condition. During construction of the Project, EPE expects to maintain its current bond ratings for Senior Notes of BBB by Standard & Poor's and Baa2 by Moody's. Schichtl Second Supp. 2.

Expenditures for solar PV panels and other equipment to be used in the Project are eligible for an ITC of 30% of the qualifying cost of energy property in service before January 1, 2017.² For example, if the qualifying cost of the energy property is \$12 million, the ITC is \$3.6 million (\$12 million x 30%). If EPE owes \$5 million in federal taxes, it can reduce the \$5 million federal tax liability to \$1.4 million by applying the full ITC (\$5 million – \$3.6 million). Prieto Direct 5-6.

Also, the tax basis of the energy property would be reduced by 50% of the ITC or \$1.8 million. Using the same example, the tax basis of the energy property would be \$10.2 million (\$12 million - \$1.8 million), resulting in accelerated tax depreciation of the

² The tax credit is a direct dollar for dollar offset to taxes payable. EPE must meet several conditions to qualify for the tax credit. The ITC can be carried forward for 20 years or carried back one year. Prieto Direct 3-4, 7.

The total net decrease in EPE's taxes under the above example is \$6.5 million.

Taking advantage of the ITC would actually decrease the cost of the Project because EPE would use the decrease in income tax expense resulting from the ITC to reduce the cost of the Project charged to HAFB. *Id.* at 6-8.

EPE seeks a CCN by November 30, 2015, so that the Project can be placed in service by December 31, 2016, to take advantage of the 30% ITC. Schichtl Direct 5. If the Project is placed in service after December 31, 2016, the ITC drops from 30% to 10%. Prieto Direct 4; Ault Direct 7. EPE expects to complete the Project by November 1, 2016. Turner Direct 4.

If the Project is not placed into service until after December 31, 2016, and the ITC is only 10%, then EPE estimates that its total net decrease in taxes under the above example would only be \$4.9 million, compared to the estimated \$6.5 million decrease in taxes resulting from a 30% ITC, a difference of \$1.6 million or 13% of the Project cost. Prieto Direct 8; Exhs. CSP-1 & CSP-2.

EPE did not include the Project in its 2012 IRP Four Year Action Plan for 2013-2016.

EPE filed a Notice of Material Change to the 2012 IRP to recognize the Project. EPE Exh. 6.

EPE did not issue a request for proposal (RFP) for the Project because it would have had to issue the RFP by August 2014 to complete the Project by December 31, 2016, and the USAF did not have approval of the Project by August 2014. The USAF informed EPE in December 2014 that it had received approval of the Project and desired to take advantage of the 30% ITC. EPE decided that there was insufficient time to issue a RFP and qualify for

the 30% ITC. For this reason, EPE asked a winning bidder of a concurrent RFP process for a similarly sized solar project in Texas to bid on the Project. Through that process, EPE chose Gehrlicher Solar American Corporation because Gehrlicher proposed the most economical option for a similar project. As a check, EPE solicited a bid from the contractor selected for a solar project at Fort Bliss, which had a higher levelized cost of energy than Gehrlicher's bid. Turner Direct 3, 8-9.

EPE provided the information for the Project required by Rules 440 and 570. Schichtl Direct 10.

V. Staff's Recommendation on EPE's Request for a CCN

Staff concluded that granting EPE's request for a CCN is in the public interest.

Carrara Direct 13. Staff identified the following benefits of granting EPE's request:

- EPE would continue to serve one of its largest customers at no cost to EPE's other
 New Mexico retail customers;
- EPE could apply the RECs generated by the Project toward its RPS at no cost to its other New Mexico retail customers; and
- HAFB would be assisted in meeting its energy goals.

Ault Direct 10.

Staff found that EPE has met the requirements of all applicable statutes and rules.

Carrara Direct 13.

Staff recommends granting EPE's request for a CCN subject to the following conditions:

1. The CCN should be rescinded if EPE and HAFB do not reach a satisfactory Replacement Contract (upon expiration of the Current Contract); and if EPE does not receive PRC approval to execute the Replacement Contract. The

Exhibit JS-35 Page 343 of 365

Replacement Contract will include provisions whereby HAFB will pay for all revenue requirements associated with the Facility at least through 2046 or until such time as the Commission may determine.

- 2. EPE will not seek to recover any revenue requirement associated with the Facility from New Mexico jurisdictional customers other than HAFB without prior PRC approval.
- EPE shall be required to file copies of all construction permits received for the Facility and associated interconnection facilities, in this docket within two weeks of receipt of the final permit required.
- 4. EPE shall file a notice of the dates that the Facility and the interconnection facilities are placed into service no later than 45 days after the in-service date.
- 5. EPE shall file the actual costs, including the actual AFUDC amounts and how they were calculated, for the Facility and the interconnection facilities in this docket as soon as they become available after the Facility and the interconnection facilities are placed into service.
- 6. EPE shall make all RECs associated with the energy produced by the Facility available at no cost for application toward compliance with EPE's renewable energy portfolio standard. Cost of registration of the RECs shall be the responsibility of EPE and shall be recovered through EPE's RPS recovery mechanism.

Carrara Direct 13-14.

EPE does not object to these conditions. EPE and Staff agree that EPE may comply with conditions 3 and 4 through a single compliance filing due no later than 45 days after the in-service date of the Project. EPE's Response to Bench Request (9-11-15).

Staff also recommends that the final order reflect that since the Project is a solar facility, no fuel costs are incurred and no fuel and purchased power cost adjustment clause approval is necessary.

Carrara Direct 13-14.

VI. Hearing Examiner's Recommendation on EPE's Request for a CCN

The lack of participation by Intervenors in this case and the absence of testimony opposing the Application superficially indicate that EPE's request for a CCN raises no concerns. However, neither EPE nor Staff acknowledges that EPE's request raises an issue of possibly first impression before this Commission: whether a public utility should be allowed to build generation plant dedicated to a single customer's use. EPE owns no existing generation plant dedicated to a single customer's use, Schichtl Second Supp. 5,3 nor do Public Service Company of New Mexico nor Southwestern Public Service Company of New Mexico, to the Hearing Examiner's knowledge.

A CCN confers upon a utility not only the right, but also the obligation, to serve within the service territory established in the CCN.* A public utility's obligation to serve in its service territory is a quid pro quo for the monopoly status it is afforded in that territory. Traditionally, therefore, a public utility builds its system to serve the needs of its entire service territory and adds plant to contribute to the efficient and adequate operation of its whole system and serve system load. Ratepayers served by an interconnected utility system all bear the costs of that system. When the PRC sets revenue requirements and designs rates, it does so on the basis of total utility system.

Conversely, public utilities traditionally have not built plant to serve a single customer because a customer should not be allowed to pick and choose the type of energy generation that serves it. This is because doing so could result, for example, in a public

³ EPE does own distribution facilities that serve individual customers. Schichtl Second Supp. 5.

⁴ Utility Case No. 2284, Final Order 6-8 (10-7-91), modified on other grounds by Final Order on Rehearing (3-9-92).

⁵ Morningstar Water Users Assoc. v. New Mexico Pub. Util. Comm'n, 1995-NMSC-062, ¶ 53, 120 N.M. 579 (quoting Dickinson v. Maine Pub. Serv. Co., 223 A.2d 435, 438 (Me. 1966)).

⁶ Robert L. Hahne & Gregory E. Aliff, *Accounting for Pub. Util's*, §10.05[7] ("Most utility costs are incurred as common costs. That is, the customers are served commonly by the system[.]").

utility building generation plant with a low cost fuel source for a large business customer, and the large business customer leaving the utility's system to receive service at a lower cost than the utility's other customers, possibly resulting in unlawful discrimination.⁷

Additionally, if a public utility builds new plant for an existing customer, costs are at risk of becoming stranded as a result of the customer leaving the utility's system. A stranded cost is the portion of any prudent investment, deferred cost or commitment not yet paid for by a customer choosing to leave a utility's system, which was made to serve that customer during a period when regulatory statutes imposed a requirement to serve it at a regulated price. Hahne & Aliff, supra, § 20.04. A customer leaving the system will not inevitably cause an increase in rates to other customers, but the potential exists that captive customers remaining on the system will be unduly burdened with fixed costs, including the cost of generation plant no longer needed.

However, these two situations — allowing customers to choose their energy source and creating the risk of strandable costs — have indirectly materialized through the increasing role of renewable energy in electric power generation. A customer can now choose to be served by renewable energy by installing a renewable energy distributed generation (DG) facility on its site. NMSA 1978, § 62-13-13.1. A person not otherwise a public utility does not become a public utility because the person owns or controls a renewable energy DG facility that is located on a host's site and "produces electric energy used at the host's site and sold to the host or the host's tenants or employees located at the host's site." *Id*.

⁷ With the exception of economic development rates and rates designed to retain retail load, a public utility shall not, as to rates or services, make or grant any unreasonable preference or advantage to any corporation or person within any classification. NMSA 1978, § 62-8-6.

Also, the potential of stranded costs is a consequence of the Renewable Energy Act (REA) because the REA requires public utilities to procure renewable resources without showing a need for additional resources. Stranded costs may arise any time a public utility with excess capacity procures renewable energy to meet its Renewable Portfolio Standard (RPS). Stranded costs may also arise any time a public utility customer severs its reliance on the grid by installing a DG facility at its site.⁸

Because HAFB did not move for leave to intervene in this case and is not a party, obvious questions cannot be asked and answered. For example:

- Why isn't HAFB building the Project itself? and
- Why hasn't HAFB contracted with a third party to build the Project?

Nevertheless, EPE ratepayers other than HAFB presumably would be better off by EPE building the Project for HAFB than by HAFB (i) self building the Project; or (ii) financing the Project through a third party. Under the latter two scenarios, EPE would not receive any revenue from the Facility and would lose 20% of HAFB's load. By building the Facility for HAFB, EPE would retain all of HAFB's load and earn a return on the Facility, producing revenues that are available to meet its revenue requirement.

There is no evidence that HAFB asked EPE to build the Project so that HAFB can purchase energy at a lower cost than it does by purchasing energy through EPE's system. In fact, Staff testified that the projected per MWh cost of energy from the Facility "is relatively high[.]" Carrara Direct 6-7. The evidence is that HAFB asked EPE to build the Project to assist HAFB in meeting USAF's goal of increasing facility consumption of renewable or alternative energy to 25% of total electricity use by 2025.

⁸ Generally, a DG facility is a facility that generates energy, is located on a customer's site, and is used exclusively to meet that customer's load requirements.

Assisting HAFB in meeting the USAF's goal is consistent with the clear purpose of the REA to encourage public utilities to use renewable energy. See NMSA 1978, § 62-16-2 (findings and purposes of REA). In addition to requiring public utilities to include a specified percentage of renewable energy in their portfolios, up to a reasonable cost threshold (RCT), the REA encourages them to acquire renewable energy supplies that exceed the RPS by allowing the PRC to provide public utilities performance-based financial or other incentives. NMSA 1978, § 62-16-4(A)(5). Also, the PRC may require a public utility to offer its retail customers a voluntary program for purchasing renewable energy that is in addition to the renewable energy provided by a public utility under the RPS. Id., § 62-16-7(B).

In a pending case in which EPE has asked for approval of its 2015 Renewable Energy Procurement Plan, evidence was admitted that the cost for EPE to meet its 2017 RPS requirement would exceed the RCT. Case No. 15-00117-UT, Recommended Decision 11-12 (9-15-15). The Hearing Examiner has recommended that the PRC grant EPE a waiver of its full 2017 RPS requirement. *Id.* at 21-22. Because EPE could use the renewable energy certificates (RECs) associated with the Facility at no cost toward meeting its RPS, when EPE already is up against the RCT and has excess generation⁹, granting EPE's Application furthers a purpose of the REA.

If appropriate, stranded costs resulting from HAFB no longer receiving 20% of its load from EPE's system could be recovered from HAFB through its Replacement Contract rates, analogously to collecting costs of ancillary and standby service from DG customers through an interconnected customer rate rider. NMSA 1978, § 62-13-13.2. Fuel cost

⁹ See Case No. 15-00099-UT (EPE's Application for a CCN for a solar facility at Fort Bliss).

savings from HAFB's use of renewable energy would be enjoyed by all EPE ratepayers because fuel savings flow through EPE's fuel and purchased power cost adjustment clause.

EPE and HAFB are negotiating the Replacement Contract to include a provision that requires HAFB to purchase all energy produced by the Facility for the life of the Facility regardless of whether HAFB continues to take retail service from EPE. Schichtl Second Supp. 4. Also, EPE has agreed to not seek to recover any revenue requirement associated with the Project from New Mexico jurisdictional customers other than HAFB without prior PRC approval. Therefore, if HAFB is closed before HAFB pays for the cost of the Facility, EPE ratepayers other than HAFB should be held harmless.

EPE's Application is unlike traditional applications for CCNs in that EPE seeks to build plant dedicated to a single customer's use. However, under the unique circumstances of this case, issuance of a CCN for the Project is in the public convenience and necessity because it helps HAFB meet its renewable energy goals and provides RECs to EPE at no cost to customers other than HAFB. Schichtl Direct 12.

VII. EPE's Request for Certification of Estimated Costs of Construction

Commission Rule 17.3.580.11 states that no utility shall obtain rate recovery of any cost overrun in the construction of electric generating plant until the Commission determines, upon notice and hearing, whether those costs have been incurred prudently. "Cost overrun" means —in instances where an allowance for contingencies was included by the utility in the certificated estimated cost — that portion of construction costs which exceeds the certificated estimated cost by any amount. 17.3.580.7(D) NMAC. "Certificated estimated cost" means the total cost of construction of electric generating plant for the utility, including allowances for funds used during construction, as estimated by the utility

at the time of issuance by the Commission of the CCN for the plant and reflected in the order issuing the CCN. 17.3.580.7(A) NMAC.

The estimated Project capital cost is \$11.8 million, excluding land lease costs.

Estimated Allowance for Funds Used During Construction (AFUDC) is \$290,000, for a total \$12.1 million estimated Project cost. The estimated additional cost of interconnection facilities is \$230,000. Turner Direct 4; Carrara Direct 5. According to EPE's Application, the estimated cost does not reflect the 30% ITC. Application, ¶ 10.

Staff recommends that the PRC establish \$12,100,000 as the certificated estimated cost of the Project. Carrara Direct 11.

In Case No. 11-00313-UT, involving Southwestern Public Service Company's (SPS's) request for a CCN for Jones Unit 4, the PRC approved a stipulation that specifically "accepted receipt of" SPS's certificated estimated cost. The Commission adopted Staff's view that the language "accepted receipt of" simply recognized that SPS's cost estimate was a good faith estimate that had been filed in compliance with Rule 580. Case No 11-00313-UT, Certification of Stipulation 21-22 (1-3-12), adopted by Final Order (2-7-12).

The PRC should in this case accept receipt of EPE's \$12.1 million certificated estimated cost of the Project, subject to EPE not recovering the Facility costs from its ratepayers other than HAFB.

VIII. Request to Accrue AFUDC

EPE requests authority to accrue an Allowance for Funds Used During Construction (AFUDC) for funds used in the construction of the Facility. Carrara Direct 10.

AFUDC is an allowance for the return on the capital costs of construction financing.

Instead of recovering that return from customers as it is incurred, the utility accrues it in an

account for future recovery. Future recovery occurs through inclusion of the capitalized cost in rate base as a component of plant in service, thereby earning a return and being recovered through depreciation allowances. Hahne & Aliff, supra, § 4.04[4]. There is little debate over the propriety of including AFUDC as a component of construction costs along with materials, labor, overhead, and the like. *Id.*

Staff supports EPE's request to accrue AFUDC. Carrara Direct 11. Therefore, EPE should be granted authority to accrue AFUDC, subject to EPE not recovering the AFUDC from its ratepayers other than HAFB.

IX. Findings of Fact and Conclusions of Law

- All findings and conclusions contained in the Hearing Examiner's

 Recommended Decision are incorporated by reference as findings of fact and conclusions of law of the Commission.
- 2. The Commission has jurisdiction over the parties and subject matter of this case.
- 3. Due and proper notice of this case and its subject matter has been given in accordance with the Public Utility Act.
- 4. It is in the public interest to grant EPE a CCN to construct, own and operate a 5 MW ground-mounted solar PV generating facility on land wholly within HAFB (the Project), subject to the conditions stated below in Decretal Paragraphs A and B.
- 5. EPE's certificated estimated \$12.1 million cost of the Project is accepted, subject to further PRC review in a future proceeding for review of EPE's anticipated Replacement Contract with HAFB.

- 6. EPE's request to accrue AFUDC for funds used during construction of the Project should be granted, subject to further PRC review in a future proceeding for review of EPE's anticipated Replacement Contract with HAFB.
 - 7. EPE's articles of incorporation are on file with the PRC.10

X. Decretal Paragraphs

The Hearing Examiner recommends that the Commission ORDER as follows:

- A. The Commission grants EPE a CCN to construct, own and operate a 5 MW ground-mounted solar PV generating facility on land wholly within HAFB (the Project or Facility) subject to the following conditions:
 - 1. The CCN shall be rescinded if EPE and HAFB are not able to reach a satisfactory Replacement Contract (upon expiration of the Current Contract); and if EPE does not receive PRC approval to execute the Replacement Contract. The Replacement Contract shall include provisions whereby HAFB shall pay for all revenue requirements associated with the Facility at least through 2046 or until such time as the Commission may determine.
 - 2. EPE shall not seek to recover any revenue requirement associated with the Facility from New Mexico jurisdictional customers other than HAFB without prior PRC approval.
 - 3. EPE shall file copies of all construction permits received for the Facility and associated interconnection facilities in this docket within two weeks of receipt of the final permit required.
 - 4. EPE shall file a notice of the dates that the Facility and the interconnection facilities are placed into service, no later than 45 days after the in-service date.
 - 5. EPE shall file the actual costs, including the actual AFUDC amounts and how they were calculated, for the Facility and the interconnection facilities in this docket as soon as they become available after the Facility and the interconnection facilities are placed into service.

¹⁰ Carrara Direct 4. Under § 62-9-6, issuance of a CCN is contingent on an applicant's filing of its articles of incorporation.

- 6. EPE shall make all RECs associated with the energy produced by the Facility available at no cost for application toward compliance with EPE's renewable energy portfolio standard. Cost of registration of the RECs shall be the responsibility of EPE and shall be recovered through EPE's RPS recovery mechanism.
- B. EPE's ratepayers shall be held harmless for the costs of the Project if HAFB ceases to receive service from EPE before it pays the costs of the Project.
- C. Review of any and all ratemaking aspects of the Project are reserved for a future proceeding for review of EPE's anticipated Replacement Contract with HAFB.
- D. EPE's anticipated filing of an application for approval of its Replacement Contract with HAFB, shall include, among all information required by law:
- 1. Proof that the proposed rates in the Replacement Contract would recover from HAFB all costs of the Facility;
- 2. Proof that the proposed rates in the Replacement Contract would recover at least the incremental cost of providing service to HAFB; and
- 3. If EPE seeks approval of the Replacement Contract to retain load, all information required to be filed with the PRC under EPE's Rate No. 30 (Load Retention Rate).
- E. To the extent required, EPE shall seek approval, when it files its 2016 Annual Procurement Plan, (i) of use of the RECs associated with energy generated by the Facility toward its RPS; and (ii) recovery of WREGIS costs associated with the RECs.
- F. EPE may accrue AFUDC for funds used during the construction of the Project, subject to further PRC review in a future proceeding for review of EPE's Replacement Contract with HAFB.
 - G. This Order is effective immediately.

- H. Copies of this Order shall be mailed to all persons listed on the Official
 Service List for this case.
 - I. This Docket is closed.

ISSUED at Santa Fe, New Mexico this 30th day of September, 2015.

NEW MEXICO PUBLIC REGULATION COMMISSION

Carolyn R. Glick, Hearing Examiner

Exhibit JS-35 Page 354 of 365

BEFORE THE NEW MEXICO PUBLIC REGULATION COMMISSION

IN THE MATTER OF EL PASO ELECTRIC	
COMPANY'S APPLICATION FOR A)
CERTIFICATE OF PUBLIC CONVENIENCE) Case No. 15-00185-UT

Certificate of Service Case No. 15-00185-UT

BEFORE THE NEW MEXICO PUBLIC REGULATION COMMISSION

IN THE MATTER OF EL PASO ELECTRIC COMPANY'S APPLICATION FOR A CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR A 5MW SOLAR POWER GENERATION PROJECT AT HOLLOMAN AIR FORCE BASE

Case No. 15-00185-UT

FINAL ORDER ADOPTING RECOMMENDED DECISION WITH MODIFICATION

THIS MATTER comes before the New Mexico Public Regulation Commission (the "Commission") upon the September 30, 2015 Recommended Decision issued by Hearing Examiner Carolyn Glick on the Application of El Paso Electric Company ("EPE") for a Certificate of Public Convenience and Necessity ("CCN") for a 5MW Solar Generation Project at Holloman Air Force Base in Otero County, New Mexico (Project) in accordance with NMSA 1978, Sections 62-9-1 and 62-9-6. Having considered the pleadings, testimony and the Recommended Decision and being otherwise duly informed in the premises,

THE COMMISSION FINDS AND CONCLUDES:

- 1. The Commission has jurisdiction over the parties and the subject matter of this case.
- 2. No exceptions to the Recommended Decision have been filed by any of the parties to this proceeding.
- 3. The Recommended Decision, including the Statement of the Case, Discussion, Findings of Fact and Conclusions of Law, and Decretal Paragraphs recommended by the Hearing Examiner, is well taken and should be ADOPTED, APPROVED, and ACCEPTED as the Order

of the Commission with the exception of Decretal Paragraph A(2). The Commission notes that because decretal paragraphs A(2) and B overlap, but potentially conflict, paragraph A(2) should be removed. Because Paragraph B is broader and affords ratepayers greater protection from potential unrecovered costs of the Project, it should control.

IT IS THEREFORE ORDERED:

A. The Recommended Decision, including the Statement of the Case, Discussion, Findings of Fact and Conclusions of Law, and Decretal Paragraphs recommended by the Hearing Examiner, as modified by the removal of paragraph A(2), is well taken and should be ADOPTED, APPROVED, and ACCEPTED in its entirety as the Order of the Commission.

- B. This Order is effective immediately.
- C. Copies of this Order shall be provided to all persons listed on the attached Certificate of Service, via e-mail to those whose e-mail addresses are known, and otherwise via regular mail.
 - D. This Docket is closed.

DECLARATION OF JAMES SCHICHTL IN SUPPORT OF THE FOREGOING SECOND SUPPLEMENTAL DIRECT TESTIMONY TO THE AMENDED APPLICATION FOR APPROVAL OF EL PASO ELECTRIC COMPANY'S 2019-2020 RENEWABLE ENERGY PLAN PURSUANT TO THE RENEWABLE ENERGY ACT

I James Schichtl, pursuant to Rule 1-011 NMRA, state as follows:

- I affirm in writing under penalty of perjury under the laws of the State of New Mexico that the following statements are true and correct.
- 2. I am over 18 years of age and have personal knowledge of the facts stated herein. I am employed by El Paso Electric Company ("EPE" or "the Company") as the *Vice President of Regulatory Affairs*.
- 3. The foregoing Second Supplemental Direct Testimony of James Schichtl, together with all exhibits sponsored therein and attached thereto, is true and accurate based on my knowledge and belief.
- 4. I submit this Declaration, based upon my personal knowledge and upon information and belief, in support of EPE's *Amended Application for Approval of El Paso*

Electric Company's 2019-2020 Renewable Energy Act Plan Pursuant to the Renewable Energy Act.

FURTHER, DECLARANT SAYETH NAUGHT.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on April 30, 2020.

/s/James Schichtl
