

# POWER ON.

## One **Power Generation** to the Next.

El Paso Electric's legacy spans more than 100 years. Since those earliest days, our approach to generating and distributing electricity has continually advanced to meet the needs of our growing community.

Today, we focus on producing energy with new, clean burning natural gas technology, utility-scale solar power output and an eco-friendly approach. These practices have resulted in national recognition for our high solar energy production and low carbon footprint.

Our efforts are part of an obligation to provide our customers with the safe and reliable service they deserve while keeping the region's best interest in mind.

Investing in a smarter kind of energy, building a more reliable grid and providing a better quality of life. It's what we're entrusted with as your Electric Company – and everything we work toward for you.

So go ahead. **POWER ON.**

El Paso Electric
