

Vending Machine Energy Misers

Program Guidelines:

El Paso Electric Company (EPE) will provide a VendingMiser[®] or CoolerMiser[™] (a \$260 initial value & \$150 annual value) or SnackMiser[™] (a \$205 initial value and \$50 annual value) to you at a reduced cost.

Because EPE's energy efficiency funds are used to provide these devices to save energy, they must remain installed on a refrigerated, non-perishable soft drink machine, reach-in cooler, or non-refrigerated snack machine in a facility serviced by EPE for a period of 7 years. If you stop using it on an approved machine within 7 years after installation, it must be returned to EPE.

TO PARTICIPATE IN THE ENERGY MISER PROGRAM, YOU WILL NEED TO UNDERSTAND AND AGREE TO THESE TERMS:

- **Approved Machines:** You will only use it on an active vending machine or reach-in cooler that is filled with sodas, waters, power drinks, beer, or other non-perishable liquid items, or on a non-refrigerated snack machine that is filled with non-perishable snack items (such as cookies, crackers, or chips). The machine must be operated on a year-round basis.
- EPE will not approve a Miser on a machine that is determined to be located in a round-the-clock high-traffic area.
- You agree to grant EPE future access to the VendingMiser[®], CoolerMiser[™], or SnackMiser[™] to verify its installation, operation, or energy savings.
- The VendingMiser[®], CoolerMiser[™], or SnackMiser[™] is provided to you only as long as it is installed on an approved machine in a facility that is served by EPE.
- Because it only saves you money if it is operating properly, you agree that you will make every reasonable effort to make sure that the VendingMiser[®], CoolerMiser[™], or SnackMiser[™] remains in the same condition as it was at the time of installation (upright sensor bracket undamaged, sensor showing a green light, Miser not on the floor, Miser plugged into the wall, machine plugged into the Miser, etc.)
- You agree to not put anything in front of the sensor that will interfere with it identifying motion from patrons.
- You agree to notify EPE at 575-523-3533 whenever the following happens so that we can better assist you and so that we can keep track of the Miser's operation and energy savings:
 - **If you replace** the original approved machine that has a Miser with another approved machine, you will remove the Miser, store it in a safe location, and call EPE so that the Miser can be reattached to the new vending machine or cooler.
 - **If you relocate** the original approved machine that has a Miser to another location, you will call EPE to make us aware of the new location so that the Miser can be located and tracked.
 - **If you remove** the original approved machine that has a Miser and do not replace it with another approved machine, you will call EPE so that the Miser can be retrieved and provided to another customer.
 - You agree to try to prevent your vending services company from breaking it or removing it from the machine, and, if they do, you will notify EPE so that it can be returned.
 - **If you add** any new approved machines, please call EPE so that we can schedule the installation of new Misers on your new approved machines.
- EPE provides assistance with warranty issues for up to 12 months after installation. After that, USA Technologies provides a 4-year material warranty at <http://www.usatech.com>. For more information, call USA Technologies at 1-800-770-8539.
- Must be installed by an authorized installer. Contact EPE for more information on authorized installation.
