

ENERGY MISERS

FOR VENDING MACHINES AND REACH-IN COOLERS

from El Paso Electric

REDUCE ENERGY COSTS

A typical vending machine consumes \$325 of electricity each year. The Energy Miser products from El Paso Electric help reduce electricity use substantially without compromising the vending machine product by using a motion sensor to know when the area is vacant.

SIGNIFICANT DOLLAR SAVINGS

VendingMiser®

The VendingMiser for cold drink machines reduces electricity use by **up to 46% or \$150 per machine annually**. Maintenance savings are generated through reduced runtime of vending components, estimated at \$40 to \$80/year per machine.

CoolerMiser™

The CoolerMiser for glass front drink coolers reduces electricity use by **30% or \$100 per cooler annually**. Greenhouse gas emissions are reduced by 1600 lbs of CO₂ and 2740 grams of NO_x per year. The CoolerMiser has the capability to control single, double, or triple door coolers.

SnackMiser™

The SnackMiser for non-refrigerated snack machines reduces electricity use by **80% or \$50 per machine annually**. CO₂ emissions are reduced by 470 lbs and 770 grams of NO_x per year.

All machines offer a quick and inexpensive solution for energy savings:

- Environmental benefits
- Early return-on-investment
- Longer machine lifespan
- Compatibility with all types of vending machines

Miser Type	Costs				EPE Rebate**	Your Cost***	Typical Savings/Year	Simple Payback (Months)
	Equipment	Install*	Shipping	Total				
Vending Miser	\$200	\$50	\$10	\$260	\$200	\$60	\$150	4.8
Cooler Miser	\$170	\$50	\$10	\$230	\$170	\$60	\$100	7.2
Snack Miser	\$160	\$35	\$10	\$205	\$160	\$45	\$50	10.8

*Must be installed by an approved and authorized installer.

**Rebate is the cost of equipment or the amount shown, whichever is less.

***Plus applicable sales taxes.

Don't miss out on one of El Paso Electric's newest energy conservation programs!

ENERGY MISER APPLICATION FORM

from El Paso Electric

Congratulations! Your participation in the EPE Saver Energy Miser Program is going to save energy and lower your monthly costs.

TIPS THAT WILL KEEP YOUR MISERS WORKING PROPERLY AND ENSURE MAXIMUM ENERGY SAVINGS:

- Misers are available to you at reduced cost for use on machines that operate in the El Paso Electric service area.
- Misers only function properly when the sensors are unobstructed by objects.
- VendingMisers, CoolerMisers, and SnackMisers are only to be used on vending machines and coolers filled with non-perishable drinks and snacks.
- If you have problems with either the Miser or sensor (you don't see a green light or you see a steady red light or no light at all), please give us a call at (575) 523-3570.
- Misers work best in areas that have periods of 3 to 4 hours or more when the area around the machine is vacant.
- If you add any additional machines or coolers (or remove them), please give us a call so we can install another Miser or pick up ones that are no longer being used.

To have your miser installed, call (575) 523-3570, fax this form to (575) 523-3593, or scan and email this completed form to billy.massie@epelectric.com.
