LARGE POWER SERVICE RATE

APPLICABILITY:

This rate schedule is available to all Customers for electric lighting, power, and heating service where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served. The Customer and the Company will determine whether a new Customer qualifies for this rate schedule. Service under this rate schedule shall be limited to Customers whose expected monthly demand will exceed 800 kilowatts (kW). A Customer who qualifies for the Large Power Service Rate must remain on this rate schedule for a minimum of twelve (12) consecutive months.

If the Customer's monthly maximum demand is below 800 kW during the current month and previous (11) month period, and the Customer's load is expected to remain at that level of demand, the Customer shall no longer be eligible for service under the Large Power Service Rate, but shall immediately become eligible for the General Service Rate or Small General Service Rate, as applicable.

TERRITORY:

Areas served by the Company in Dona Ana, Sierra, Otero and Luna Counties.

TYPE OF SERVICE:

Service available under this rate schedule will be determined by the Company and will normally be single or three phase at the option of the Company and at a standard Company approved voltage. All service will be taken at a single point of delivery designated by the Company.

The On-Peak period shall be from 12:00 P.M. to 6:00 P.M., Mountain Daylight Time, Monday through Friday, during the months of June through September. X

The Off-Peak period shall be all other hours not covered in the On-Peak period. X

MONTHLY MINIMUM CHARGE: X

The Customer Charge plus the Demand Charge plus the Tax Adjustment. X

DETERMINATION OF BILLING DEMAND:

Maximum demand will be defined as the highest thirty (30) minute average kilowatt load determined by measurement.

The billing demand will be the highest of:

- (a) the maximum measured demand, adjusted by the Meter Voltage Adjustment, if applicable, or X
- (b) 65 percent of the highest measured demand established during the twelve (12) month period ending with the current month, or
- (c) a minimum demand of 800 kW. X

POWER FACTOR ADJUSTMENT:

If the power factor at the time of the highest thirty (30) minute interval kilowatt demand for the entire load is below 90% lagging, a power factor adjustment shall be calculated as follows:

METER VOLTAGE ADJUSTMENT:

If electric service is delivered on the high voltage side of a Customer-supplied transformer, but service is metered on the low voltage side of the transformer, the following meter adjustments shall be made:

Adjusted Maximum kW Demand = Metered Maximum kilowatts multiplied by 1.014
Billing kilowatt-hours = Metered kilowatt-hours multiplied by 1.020

If electric service is delivered on the low voltage side of a Company-owned transformer and metered on the high voltage side of the transformer, the following meter adjustments shall be made:

THERMAL ENERGY STORAGE RIDER

This rider is available to customers with separately metered Thermal Energy Storage (TES) Systems whose maximum demand does not exceed the maximum demand of the building after completion of the necessary contract arrangements and installation of the necessary metering equipment. The billing demand for this separately metered load will be the highest measured thirty (30) minute average kilowatt load established during the On-Peak period.
